# FOOTPRINTS QUALITY

## THE FOOTBED STRUCTURE

## THE FOOTPRINTS FOOTBED

The anatomically shaped cork-latex-footbed is based on the natural footprint people make and guarantees an optimum environment for the feet by carefully selected materials.

The footbed in all FOOTPRINTS shoes can be replaced or removed to air it out or wash it (at 30° C). As an additional Service there is the possibility to order a substitute pair.

## FOOTPRINTS-LEATHER

Our leather is tanned economically and in an environment-friendly manner without using synthetic dyes. Thus the pores of the leather stay open and breathe actively. Differences in colour combination and scar patterns on the surface of the leather reflect the fact that the leather is treated and preserved in its natural state.

## PROCESSING

We only use the best and most beautiful types of leather for our shoes and we place especially great value in processing them in such a manner to make them uphold the tradition of shoemakers.

## THE CORRECT FORM FIT

When you buy your FOOTPRINTS always make sure you get the right length. You should have a little room left over in the heel and toe areas so that the toes can move freely when you walk. The toes must not touch the edge of the footbed at all. There are many models in metric sizes to help you find the optimum fit. This means: One size every 5 mm. But it is not only the right size - you also need the right width for light shoe comfort. For this reason most of the models are also available in two widths:

- 
 These symbols designate FOOTPRINTS for normal to broad feet.
- 
 This symbol stands for thin, narrow feet.

## SYMPATEX®

For great demands for the wearing comfort; some of our trekking shoes do have a SympaTex-membrane - water resistant and breathing. So that the protection is ensured, regular re-proofing is recommended.

## COSTUMER SERVICE

The perfect delivery service including the repair service are for us a matter of course. The most important factor of FOOTPRINTS is the customer, who can expect the best quality from us.

\_without toe grip,  
with heel padding

# KIDS

## THE SYSTEM OF THE TWO FOOTBEDS

### THE SPECIAL THING ABOUT OUR KIDS SHOES: THEY CAN GROW.

You receive one additional footbed with every kids shoe. The inlaid footbed is shaped to allow the smaller sizes to fit. When the foot grows the first footbed is replaced by the second, larger one. Both footbeds sit firmly in the shoe and conform perfectly to the kids foot.

### DULUTH

one width  
light rubber sole  
size 24-34

\_leather, suede leather - pink
