Birkis for both work and leisure time

Find out all you need to know about Birkis on pages 82-83.

Fans of Birkis,

The time has finally arrived! The first rays of sunshine are enticing us out into the open and even the holidays don't seem that far away. So, there is only one thing for it – put on your Birkis and go out and get some fresh air. Because as you know, wearing a pair of Birkis relaxes your feet with every step you take. You can discover why by reading page 4/5. Here you will find all you need to know about healthy and comfortable walking. Prepare yourself for the summer with our new collection –

featuring new styles, colourful designs and Disney Birkis for both young and old. What's more, our 2012 collection has been divided into five new categories. They are called: 2gether, live, street, basic and function. This way you will get an even better overview of the varied and wonderful world of Birkis.

Have fun browsing.

- Footbed for narrow feet
- Footbed for normal feet
- The same styles for both young and old
- Sole with an extra layer of cushioning
- Footbed with a soft latex cushion
- The footbed is water resistant and softly elastic

You will find further information on these features on page 4/5.

A holiday for your feet...

The anatomically formed Birki's footbed conforms to the natural shape of your feet – it's almost as if you are walking barefoot in the sand. You will walk both more healthily and comfortably, allowing you to do a lot more with your loved ones.

...Well-being for the whole body

The Birki's footbed is not only good for your feet – your whole body will feel better for it, allowing you to enjoy a more relaxed holiday and benefit more from your free time.

Wellbeing, pure and simple – better balance relieves joints and back.

More fun moving – Birki's encourages the muscles to exercise.

Tension relief throughout the day – the natural rolling movement of your feet when walking is supported on the Birki's footbed.

Healthy walking has a positive effect on your body and your well-being.

Heel cup –

the heel area is deepened to mimic a footprint in the sand, providing welcome relief for your back.

Longitudinal arch support –

keeps your foot firmly in the footbed and makes sure that your weight is evenly distributed.

Toe gripper –

gives your muscular system a work-out, almost as if you were picking something up with your toes.

Footbed edging –

enhanced all-round protection to provide your feet whilst keeping them firmly inside the footbed.

The classic Birki's cork footbed

It is elaborately produced using natural materials, giving you long-lasting pleasure from your shoe.

The soft **suede** caresses your feet – providing an even greater feeling of well-being.

The **first jute layer** draws moisture away from your foot – creating a pleasant level of wearing comfort.

The heart of the Birki's footbed is the **cork-latex core** – which is inspired by the idea of a footprint in the sand.

The **second jute layer** gives the footbed additional stability – every step of the way.

And finally, there's the EVA sole which is very durable and slip resistant.

You'll find your favourite Birki's model with the following features:

This footbed incorporates an additional latex cushion, ideal for those who prefer a soft Birki's footbed.

With its extra soft cushioning layer, the soft[®]base sole provides more comfort when walking on hard surfaces: e.g. stone, concrete and asphalt. It can be recognised by its two layers.

The PU footbed is enjoyably soft because of its millions of air bubbles, is water resistant and perfect for every fun activity – on the beach, in the pool and when out for a stroll.

Ideal for all those families who wish to be "coordinated" – these models are available in adult and child sizes.

Your foot needs a bit of leeway on the Birki's footbed. For this reason there are many Birki's models which come in two width sizes: for narrow and for normal feet.

Our Birki's models with Disney designs can be found from page 20 onwards.

The charity shoes in our latest collection can be found on page 16.

Discover life together

2gether.

Birkis

Inseparable companions

Our "2gether" models are ideal for animal tamers, lovers and Disney fans, accompanying all of them on their adventures. The design can only be recognised as one when both shoes are positioned next to the each other. This allows even the smallest amongst us to quickly learn how to put their shoes on correctly.

Hint "Kay" & "Camden"
As well as our "Camden" model, there is also the "Kay" dog. It looks confusingly similar to the "Camden" but the "Kay" also has a back strap which can be fastened, giving more support to children's feet in particular.

Hint *Cute faces*
Our new Disney designs are appealing not only because of their refined designs but also because of the cute faces and sweet cross straps. And for those families who want to be "coordinated", most of the models featured on this spread are available in sizes to fit both young and old.

Info

For both young and old
Ideal for all those families who wish to be
"coordinated" – these models are available
in both adult and child sizes.

Info 
 Simply soft
 Our aqua soft-footbed is enjoyably soft because of its millions of air bubbles, is water resistant and perfect for every fun activity – on the beach, at the pool and when out on a stroll.

Hint

*The best from two shoe worlds
 The new Skippers are the bridge between different shoe worlds: they have the shape of a clog, are as comfortable as a clog but visually they resemble a moccasin. The strong cotton also gives them a rather sophisticated air.*

Info 
Softer tread
 The Skippers which are featured on this page also have a soft®base sole (see page 4/5).

Fun-Shoe
€ - art.-no. 0 25 50 9

size 26 – 34

Hint

With seven ideas suitable for children:

1. Perfect fit – using the best of materials.
2. The footbed can be removed and is easily dried.
3. The finger strap enables even the youngest children to slip the shoes on by themselves.
4. No lacing, instead watertight seams.
5. Thick lining for toasty feet.
6. Practical – Velcro fastener for children's hands.
7. If required, can be washed by hand (in temperatures up to 30°C using a mild detergent).

Material-Hint

Light and hardwearing

Birki's fun boots and fun shoes are made of ALPRO-cell. This material is particularly light which means that children can cavort outside to their heart's content. ALPRO-cell is so hardwearing that it is the perfect companion on every adventure. Once the fun boots or fun shoes are dirty, they can be easily washed by hand (in temperatures up to 30°C using a mild detergent).

Super-Birkis

Ideal for the most demanding tasks
the **Profi-Birki**

Very easy to clean!

So that you can enjoy your design clogs for as long as possible, please read the following tips on how to look after them:

- Clean your clogs by hand and then leave them out to dry.
- Do not wash your clogs in the washing machine and do not use any harsh detergents.

This way your Birkis will stay as good as new!

These cleaning instructions only apply to our design clogs, all other ALPRO-foam clogs can be washed in temperatures up to 60°C.

Hint

Profi or Super?

The difference between the Profi- and the Super-Birki is that the Profi-Birki has a deeper tread and a raised heel. They are both oil and fat resistant. For this reason these clogs can be worn where it matters: e.g. in the kitchen, in the garden or even in the operating theatre.

Good for your feet –

Good for the environment

Download our environmental brochure now: www.birki.com

All of us here at Birki feel that anyone who wants to feel good today should also think of tomorrow. For this reason, we ourselves have made a commitment to the following quality and environmental principles:

Health is the priority

The anatomically formed Birki footbed strengthens muscles and relieves joints and ligaments. To help you to achieve good health we only use natural materials because nothing is more health-giving than that which

nature itself provides us with: e.g. cork and rubber.

Environmental protection is our focus

Little waste, no solvents, instead solar technology and energy saving production processes – this is something

we value. We strip the cork for our footbeds with the utmost care from the cork trees. We use all of our production waste to manufacture playground equipment and sports ground surfaces.

Good for people

All of us here at Birki are great supporters of families:

We would like to ensure that everyone, both young and old alike, can enjoy their leisure time unhindered. Therefore, we make every effort to pay close attention from the very beginning to the needs of our customers. We design, develop and manufacture our shoes exclusively in Germany. Our shoe designers have themselves for the most part their own families and, as a result, are fully

aware of what it is all about. They only develop Birki which they themselves would also like their children to wear – with the highest level of quality and using state-of-the-art manufacturing technology.

It is our wish that many more generations to come can also be part of the Birki experience.

The Birki feel-good materials

When you wear a pair of our Birki you should experience an overall feeling of well-being and walk more healthily. This is the reason why we also have high standards when it comes to the materials we use.

The basis for our shoes are our cork footbeds. To make these we only use materials which are natural in origin: cork, rubber and jute. They support the natural walking process with their cushioning properties.

For the uppers we mainly use Birko-Flor. This fleece is very soft, sturdy and caresses the foot. With the bathing sandals, we have fused this inseparably with the footbed. In this way, we are able to dispense with adhesives – to the benefit of both your health and the environment.

We also use a range of carefully selected leather types. We coat our cork footbeds with soft, breathable suede – creating a skin-friendly environment for the foot.

Our buckles ensure that our models are the perfect fit – holding the foot firmly in the shoe. In order for you to enjoy your Birki as long as possible, we protect our buckles by applying a powder coating to them.

When working in the garden or enjoying the sea-side, your feet can enjoy a real pampering in our models made of ALPRO-foam or ALPRO-cell. Both materials are flexible, water and dirt resistant. ALPRO-cell is also very light. In addition, the materials are very easy to clean. Please read the cleaning instructions carefully on the respective pages.

Browse for something different again and again: www.birki.com

At www.birki.com, there's always something new waiting to be discovered: All Birki models for adults and children, information on our commitment to healthy feet and the environment and, of course, the Birki distributors located all over the globe.

It's always worth popping in for a visit – either to gather new ideas or to find an Birki retailer near you.

At www.birki.com, we have compiled a list of the most important addresses organised by continent and country.

*Come and see us!
We look forward to welcoming you online.*

A perfect combination: Our new denim-leather sandals

“Andra”, “Finn” and “Marten” are the names of the new models of sandals which will complement the diverse world of Birki with the 2012 collection. The high quality uppers made from denim and leather, which Birki is combining for the first time, are painstakingly made and simultaneously lend an air of casualness and sophistication. These Birki are true eye-catchers with their robustly striking used denim look.

The colours of the snaps and seams complement the uppers and round off the “used” style. This makes the new denim-leather models the perfect companions for adventurous feet.
